

## TELEHEALTH PREPAREDNESS SURVEY

**Client Name:** \_\_\_\_\_

**BCBA Name:** \_\_\_\_\_

**BT Name(s):** \_\_\_\_\_

**Completed by:** \_\_\_\_\_ **Date:** \_\_\_\_\_

**Prerequisite Skills of Client:**

Check the appropriate column for each skill required to participate in telehealth effectively.

Your client can:	Yes	Sometimes	No
(1) Look at the screen upon hearing name via video			
(2) Come to the work area upon request from the practitioner via video			
(3) Respond to previously mastered instructions delivered via video (i.e., basic one-step directions, imitation, or procuring materials)			
(4) Identify items on the screen receptively and expressively (i.e., "Touch the tree" or "What is this?")			
(5) Respond to social praise delivered via video			
(6) Remain seated during video instruction without prompts from family members or other people in room	Record duration here: _____		
(7) Attend to screen without engaging in problem behavior such as swiping to a different screen or pressing buttons repeatedly on device	Record duration here: _____		

1. If client did not meet all prerequisite skills, what strategies will you use to teach the required skill(s)?
  
2. Will any current goals or targets need to be modified while telehealth services are being provided? If so, write the current goal and provide a reason for the modification.
  
3. Is there a parent, older sibling, or other family member who will assist with prompting and reinforcement during telehealth sessions? What would be their role?
  
4. What parent training is required to prepare for telehealth? (Include specific goals, measurement, and mastery criteria as you typically would with parent training goals.)
  
5. Are there any safety concerns for this particular client (i.e., implementation of behavior interventions, self-injury, aggression, bolting, etc.)?
  
6. Are there any recommendations for changes in how services are provided? (For example, instead of one one-hour session per day, having two 30-minute sessions per day.) If so, provide justification for change.
  
7. Are there any other concerns or considerations that need to be made in order to ensure the effectiveness of telehealth services?
